### When selecting inserts, consider the following:

**Type of Deposit:** Inserts are uniquely made to handle different levels of deposit. Consider the force needed to remove the deposits.

**Treatment Site:** Select inserts that are specially designed for the type of tooth anatomy you will be working on.

Thicker inserts with larger tips are designed for heavier levels of calculus.

Thinner inserts with slim, adaptable tips are designed for the removal of light to moderate deposits or biofilm.

Straight inserts are designed for flat tooth anatomy.

Curved inserts are designed to give you the best results in furcations and concavities.
